Daydream Attractor

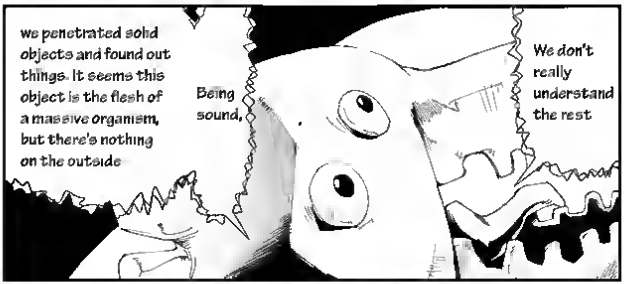
小林銅蟲

Mornin'
...

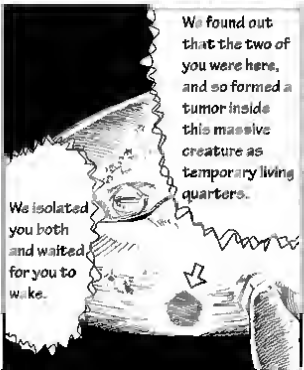
I've got something to ask you...
Ah. So, you're up then
ボコ
Glurp...
Glurp glurp glurp
We are.
Who are you again?
It depends
Don't you remember?
The whale exploded when the festival was being set up And you appeared
Then there was someone else too
She
erased physical substance of us, humans nearby and turned us into mere sound

So that's why there was that helluva noise, right?

And then we were pulled into the sea



We penetrated solid objects and found out things. It seems this object is the flesh of a massive organism, but there's nothing on the outside
Being sound,
We don't really understand the rest



We found out that the two of you were here, and so formed a tumor inside this massive creature as temporary living quarters.
We isolated you both and waited for you to wake.

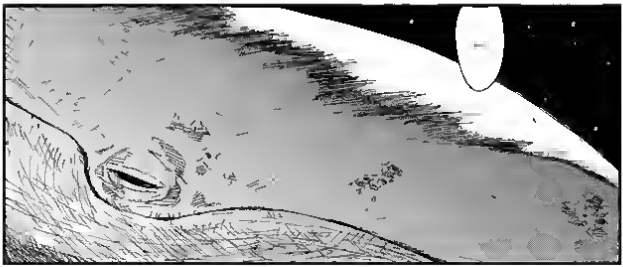
Whoooosh...
ゴゴゴゴ

You're not wrong.

What a sleep!
Oh yeah.

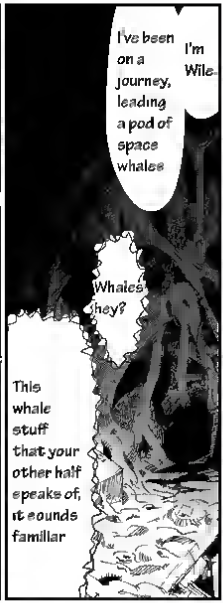
Wi...

Perhaps coupled with my experiences might tell us more.
I get the gist
Klok-klam
Whop
Biwok



No way is she my other half!

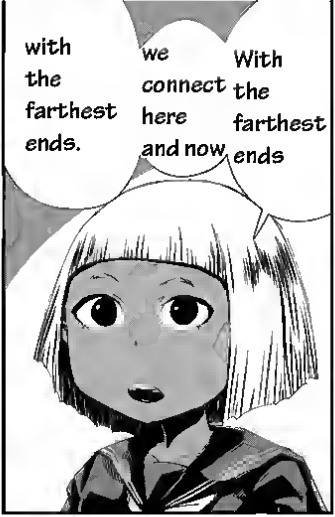
Hmm, at this stage, we don't find anything strange whatsoever, but who are you two?
We're perhaps the same as you guys
I'm not sure why i was born, though



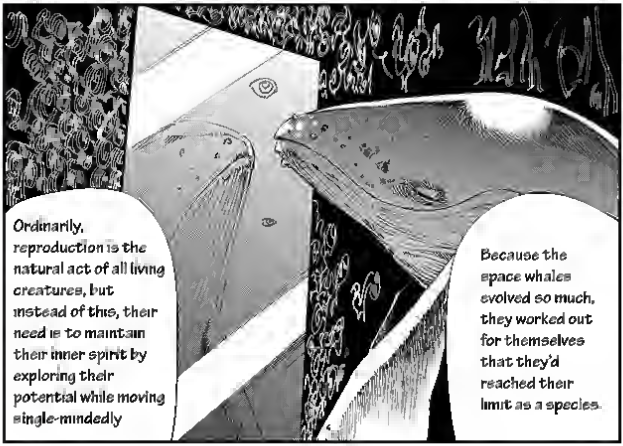
I've been on a journey, leading a pod of space whales
I'm Wile
Whales? hey?
This whale stuff that your other half speaks of, it sounds familiar

The farthest ends, hey?

Some people also call them "potential."
Yep



With the farthest ends
we connect here and now
with the farthest ends.



Ordinarily, reproduction is the natural act of all living creatures, but instead of this, their need is to maintain their inner spirit by exploring their potential while moving single-mindedly
Because the space whales evolved so much, they worked out for themselves that they'd reached their limit as a species.

Put plainly, the space whales are crazy
Should I be doing something about it
Those crazy creatures
shouldn't they be left to their doom?
They're just a single species Who are we to meddle?
As part of an ecosystem, and more widely, we
This world is warped, and so
we make our own lives
What's more

Just like light and dark.
like water and oil,
the complement of potential
is the end (Pakala).

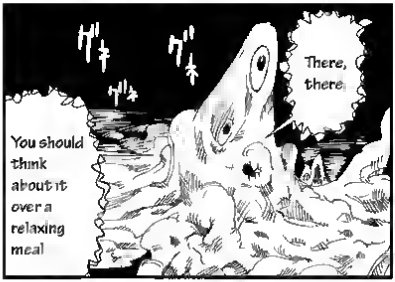
Oh shit!
Wasn't this guy somewhere in my dream just now

What was my dream about again???

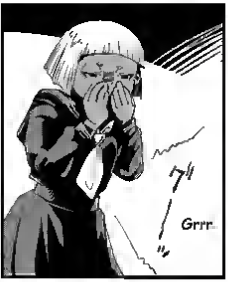
Ohhhh, no

Hey, what's up?

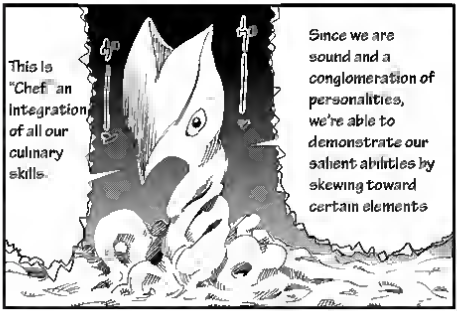
It is a problem!
Just a dream! It's not the worst of your problems



There, there
You should think about it over a relaxing meal



Grrr



This is "Chef" an integration of all our culinary skills
Since we are sound and a conglomeration of personalities, we're able to demonstrate our salient abilities by skewing toward certain elements

Let's see now
What would you like to eat?

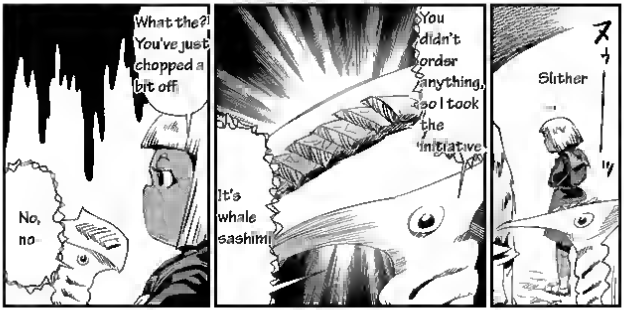
Phwack!
OK I'll have...
...nothing, because I'm not the slightest bit hungry
You can decide Wile
Really? How lovely for you
I just wish it could've continued
Hey, Wile
I had a dream
Throb, throb, throb
Let's see now

Hey, Pakala
You sure you're not getting confused with things that actually happened?
Quiver, quiver
ぞわっ
ぞわ
In my dream, right, this whale exploded with a mighty blast, destroying this festival on the beach
I even know the whale's name
That's not true!

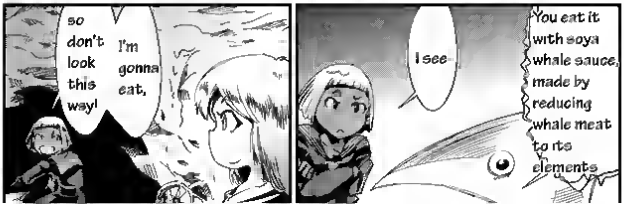
What did you say?!
! ?
Here goes
Tee-hee
Answer me!
Ah
You're not gonna trick me by saying the whale's name out loud
Pakala!

One, two...
On three now
Sing a Gregorian chant.
Never mind.
Huh?
Tat-tat
That's the name of the whale that exploded on Earth the other day.
Looks like you can't remember your dream either, hey.
I didn't know that.

If that's the case, then is this whale
not under anyone's control now?



What the? You've just chopped a bit off
No, no
It's whale sashimi
You didn't order anything, so I took the initiative
Slither

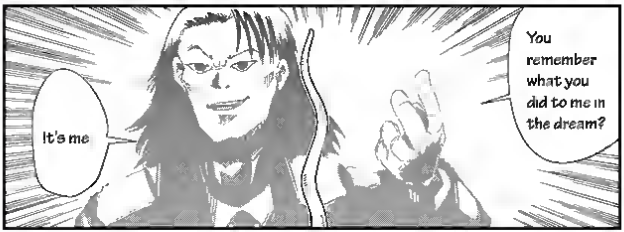


so don't look this way!
I'm gonna eat,
I see
You eat it with soya whale sauce, made by reducing whale meat to its elements

Yo!

Huh?

Gross! It's a parasite!



It's me
You remember what you did to me in the dream?

Whoooosh...
ゴゴゴゴ
This whale...
is under the control of its mother
ゴゴ..

Oh!
No
But
Huh?
Argh!
